About CdLS

Cornelia de Lange Syndrome (CdLS) is a congenital spectrum disorder. It causes a range of physical, medical, and developmental challenges, and occurs in approximately 1 in 10,000 live births. The effects of CdLS range from mild to severe, and it affects both genders equally.

For more information, please contact Lisa Schroeder at lschroeder@cdlsusa.org or 860-899-1227
